Success comes through effort, not wishes.

AI: Enterprise adoption of AI agents continues accelerating as businesses focus on workflow automation.

Big Tech: Cloud providers continue expanding AI infrastructure investments to meet enterprise demand.

Startups: AI-native startups remain the largest recipients of venture funding.

Engineering: Security and observability remain top priorities for platform teams.

Market: Employers increasingly prefer candidates with demonstrable AI project experience.

Signal vs Noise: Ignore speculative AI hype. Focus on production skills.

Reflection: Observe technology calmly. Invest in capabilities, not excitement.
